

## draw a tree...make a forest

Inspired by the artwork of Abel Rodriguez, from our exhibition *Seized By the Left Hand*. Abel was a tribe leader in an area of the Amazon Forest - he draws trees and animals from his memory. These are things that were very important to him and his people that have been cut down or made extinct.

Draw your own tree or trees, what can you remember about the shapes of different kinds of tree? Cut them out and make a forest in your home on the wall or in the window. Share with us using **#DCAmakes**
