

As **No Time To Die** continues to dominate the box office, we also have plenty of alternatives for anyone who fancies something a little different.

**Gagarine** is an intoxicating blend of the urbane and the fantastical, taking as its backdrop the real-life Cité Gagarine, a sprawling housing project on the outskirts of Paris. If you're looking for school holiday fun, **Even Mice Belong in Heaven** is a gorgeously animated stop-motion delight with a big heart and some big themes, which it tackles with skill.

We've got some cultural treats too, with **The V&A Presents Alice: Curiouser and Curiouser**, **Live from the Met: Boris Godunov** and **Exhibition on Screen: Raphael Revealed** all showing this week.

On Sunday, we have a preview screening of new Scottish documentary **Long Live My Happy Head**, a disarmingly funny and moving film about artist Gordon Shaw, who uses the art of comics to explore his relationship with his inoperable brain tumour, which he nicknames Rick. It's a wonderful film and we're thrilled that directors Austen McCowan and Will Hewitt will be in attendance to answer your questions.
