

Mirrored Mark Making

Inspired by Mark Wallinger's *id Paintings* (2015/16), make a symmetrical drawing with paint or ink blots. Use our below template or a blank piece of paper.

- **Secure the page**

Fold the page along the dotted line and tape the paper down onto your table so that only one side shows.

- **Make your marks**

Get a straw and some paint/ink. Drop or splat the paint/ink on the paper and blow using the straw. Untape the paper and fold the blank side onto the painted side and smooth it flat.

- **Add detail**

Open up the paper and take a look at the symmetrical shape. When it's dry you can draw on it and turn it into something - use your imagination to see an image in the shapes.
